Currently, ENV personnel are using a custom built application written in **C#** to manage HR-related activities. The goal of this project is to further enhance the application, add two additional modules for training and security access information tracking, develop more reports, add an audit log feature to this comprehensive and integrated program, and provide additional functionality to enhance their productivity. The final product will continue to be a Web-based application using an SQL-compliant database, intuitive to use, and easy to administer.
